

I'm Agnel, a Web Developer

@oslohaz_e

About me

I'm Agnel Francis, a web developer and Computer Science & Cybersecurity student passionate about building modern websites and digital solutions. I enjoy learning new technologies, working on creative projects, and turning ideas into reality through code. My interests include web development, cybersecurity, open-source software, and creating applications that solve real-world problems.

My education

JYOTHI ENGINEERING COLLEGE / 2026-2029

Computer Science Engineering (Cybersecurity)

SARVODAYAM VHSS ARYAMPADAM / 2024-2025

B.S Computer Engineering Technology

Skills

**HTML
& CSS**

Javascript

React JS

Python

My Projects

AerisIQ

JAN 2021 / PRESENT

AerisIQ is a Free and Open Source Software (FOSS), privacy-first disaster risk intelligence and local safety utility application for Android. The app queries public warning feeds, parses raw disaster bulletins, combines them with live local weather telemetry, and processes the combined datasets using an offline Large Language Model (LLM) running securely in the device's sandbox.

Bussiler

APR 2018 / JAN 2021

Bussiler provides a lightweight, user-friendly interface for passengers to check schedules instantly. By digitizing manual timetables, we've reduced waiting times and improved travel planning for hundreds of daily commuters.
